

# Activity: Reading the Manuscript

First find an interesting preprint in your field. Try [BioRxiv](#), or [arXiv](#).

## Read the manuscript #1

First read the manuscript through for a 'big picture' assessment and answer these questions.

What is the main research question?

What are the key findings of the study?

How does the study relate to published literature on the topic?

**Top tip**  
Sleep on it! - Give your mind a break between readings to let the new information sink in.
